Why Erasoft Software Solutions  06
Brief introductions of Education Management System  07
It's all begin in 1999

Erasoft was established in 1999 at Peshawar, Khyber Pakhtoonkhwa Pakistan. The primary objective of Erasoft is two-folded. It provides an excellent training opportunity on state of the art technology in computer sciences. On the other hand, it provides complete business solutions to the local as well as international business. At the moment around 100 students per month are receiving training from Erasoft. These IT Professionals are working in leading edge IT companies both nationally and internationally.

In Pakistan, Erasoft contributes in the field of IT as under.

1- Provides a quality, efficient and user-friendly computerized business solutions in very affordable cost for the purpose to promote IT in Pakistan and aware the businessmen to adopt recent technology.

2- Erasoft is the only software solution company in Province Khyber Pakhtoonkhwa that provides software solutions to education institutions.

3- Provides a specialized and practical oriented training to the students of IT, government officials and others individuals to strengthen their knowledge in cutting edge technologies and prepare them to work independently in a very short period of time.

4- Provides Internship to the students for the purpose to convert their theoretical knowledge into practical knowledge and thus students get experience before joining the practical job in government or private sectors.

5- Currently Erasoft is specialized in ORACLE solutions and thus producing DBAs and Developers and trying to fulfill the needs of such specialists in the country.
Erasoft in key figures

Erasoft ended 2009 with a highly satisfactory result. Most of the Erasoft products was initially implemented in Peshawar city of Khyber Pukhtoonkhwa and then due best result and reputation gradually extend to other part of the province like SWAT, Mardan and Swabi etc.

In 2009 the Erasoft was nationally known due to reliable products and our products was purchased by other organization thought out the country like in Pindi, Islamabad, Lahore and Karachi.

The progress goes and at the end of the year our products sale and services extend to International Level and our products are now using internationally in Dubai and Afghanistan.

We are looking forward and committed to provide best services to our clients at the earliest and therefore we have various organizations utilizing our services continuously like

1- SPS College Swat (More than 8 Years)

Brief introduction of Education Management System

This software has been developed in 10g application server, that is a totally web based technology and from any where in the world you can easily make a request and use the software. There is no need of any configuration in the client system either using local or wide area networks. This is not just an automation of the Education System but due to proper implementation of this system, Education System Quality/Quality of Services is assured.

Database Administrations tasks like User Creation and assign them different Rights, taking Backup and Recovery etc are fully implemented in FrontdEnd and any one can easily manage the software in absence of Database Administrator.

The software is mature one and different schools, colleges and universities in the country are successfully running the software and they are highly benefited. This software is a product of Erasoft Peshawar, the only single software house in NWFP that provide Education Solutions. This is a commercial project and we updating it on regular bases on the demand of our clients.

This software is running in different schools, colleges and universities and therefore we gone through multiple experiments and for any new clients this software provides all those experiences and results that is already adopted by different universities and the new client is in better position to take certain decisions when implementing this software. This software almost cover all the aspects of education institutions but improvement in quality has no limits and therefore the software is modifying on regular basis and thus it demands for new clients increase day by day.

The prominent features of this Software are

1. This system works in all situations either you using Annual Education System, Term Base Education System, Semester Base System or Course Base System.

2. Web based system that can be easily accessed from any where in multiple user environments.

3. Full fledge security on users and administrator can grant different types of security to different user.

4. The system is not just automation for the business but it focuses on the parameters that raise the education system quality level high.

5. This is a Research Based Software and each module was implemented, tested and enhanced in different schools, colleges and universities with the passage of time.

6. Developed in high demanding tools Oracle 10g Database and 10g Developer.
